PROFESSIONAL SUMMARY

Data Analyst with nearly 2 years of experience delivering commercial analytics, revenue forecasting, funnel analysis, and reporting automation across APAC. Proficient in SQL, Python, Power BI, Salesforce, and Oracle, with experience supporting multimillion-dollar sales, pricing, market-entry, and customer-retention decisions.

PROFESSIONAL EXPERIENCE

Industrial Scientific Corporation

Business Analyst

Singapore

Jul 2025 – Present

- Built an **APAC commercial analytics platform** integrating Salesforce and Oracle data, replacing a 20-year weekly Excel reporting process with daily visibility across opportunities, bookings, backlog, invoicing, and revenue.
- Contributed to a record **\$4.3M quarterly sales result**, exceeding a \$3.9M target by **\$400K**, by improving forecast visibility, standardizing sales reviews, and identifying priority opportunities for regional sales directors.
- Increased monthly opportunity creation by **120%** by developing live Power BI dashboards and management reports tracking customer meetings, opportunity value, funnel movement, and sales-team performance.
- Diagnosed a **\$2.26M subscription revenue gap** through account- and funnel-level analysis of customer readiness, sales engagement, contract timing, and pipeline progression, enabling leaders to prioritize recovery actions.
- Supported a successful **\$2M tender** through scenario-based pricing analysis, proposal development, and cross-functional coordination with Sales and Finance.
- Secured approval for a **\$150K product-certification investment** by developing a business case for a **\$20M marine-industry serviceable addressable market**.

Business Analyst Intern

Sep 2024 – Jun 2025

- Developed a customer churn-risk model using contract value, remaining contract duration, support cases, and customer engagement indicators, identifying approximately **\$50K in at-risk recurring revenue** for early intervention.
- Automated subscription quote calculations and pricing validation, accelerating customer response time, improving quotation consistency, and contributing to a reported **60% increase in closure rate**.
- Created an AI-enabled commercial onboarding program for **46 sales employees and leaders** using SharePoint, HeyGen, Synthesia, and a sales knowledge chatbot, reducing recurring training effort by **30%**.
- Designed the APAC distributor and vendor onboarding workflow with Legal and Salesforce developers, adapting the US process to centralize contract preparation, approvals, and stakeholder communication.

Meiyume (Singapore) Pte. Ltd.

Data Scientist Intern

May 2024 – Aug 2024

Singapore

- Secured a **paid follow-up client study** by developing a competitive intelligence solution using **Python and Llama 3** to analyse leading UK skincare brands, identify emerging ingredient trends, and convert consumer sentiment into prioritised New Product Development recommendations.
- Applied **topic modelling and sentiment analysis** to luxury fragrance reviews, identifying packaging attributes, design preferences, and customer pain points influencing product perception, then translating the findings into actionable product design and positioning recommendations.
- Reduced recurring HR reporting time by **90%** by developing an automated workforce analytics dashboard and forecasting workflow using AWS-based data pipelines, providing management with consolidated visibility into workforce trends and planning needs.

Corning Singapore Holdings Private Limited

Data Analyst Intern

Jun 2023 – Dec 2023

Singapore

- Identified **\$200K+ in annual APAC procurement savings** by analysing supplier pricing, purchasing volumes, and global sourcing data using **Python and Power BI**, enabling procurement teams to prioritise bulk-purchase and supplier consolidation opportunities.
- Reduced refresh time by **40% across 30 Power BI dashboards** by redesigning data models into star schemas and optimising Power Query transformation workflows, enabling faster and more reliable access to procurement and supplier performance.
- Led a team of three to deliver an automated **VBA supplier KPI reporting solution within one week**, eliminating **25+ manual hours per month** by automating data consolidation, KPI calculations, validation, and report generation.

TECHNICAL SKILLS

Programming & BI: SQL, Python, R, VBA, Power BI, Tableau, Excel, DAX, Power Query

Data & Platforms: Snowflake, Oracle, Salesforce, SAP, AWS, ETL, Data Modelling, Data Validation

Analytics: Statistical Analysis, Forecasting, Funnel & Cohort Analysis, KPI Design, Root-Cause Analysis, Dashboard Design

EDUCATION

Nanyang Technological University

Bachelor of Engineering in Electrical and Electronic Engineering, Honours (Distinction)

Aug 2021 – Jun 2025

Singapore

Specialisation: Data Analysis and Machine Learning

Award: Dean's List, Academic Year 2023–2024
